

CITY OF SOUTH LAKE TAHOE

Development Services Department, Building Division

1052 Tata Lane South Lake Tahoe CA 96150 Phone (530) 542-6010 • Fax (530) 541-7524 Web address: www.cityofslt.us/

2020 -2023 CANNABIS BUSINESS SUBMITTAL CHECKLIST

This submittal checklist is required to be completed by the applicant and submitted with all applicable sheets identified in columns below. It will ensure your submittal is complete and accepted for review.

APPLICANT SIGNATURES REQUIRED ON PAGE 9

All construction drawings shall comply with the minimum requirements of the following codes effective January 1, 2020 PLEASE NOTE: THE CITY OF SOUTH LAKE TAHOE IS DESIGNATED AS VERY HIGH FIRE HAZARD SEVERITY ZONE

2019 California Building Code (CBC) 2019 California Plumbing Code (CPC) 2019 California Mechanical Code (CMC) 2019 California Electrical Code (CEC) 2019 California Fire Code (CFC) 2019 Residential and Non-Residential Energy Standards (T24) 2019 CAL Green

City Ordinances and State Laws

DESIGN CRITERIA

Minimum soil bearing 1,500 PSF Ground Snow Load: 150 PSF Seismic Design Category: D Frost Line Depth: 18 inches Climate Zone: 16 Ice Barrier Underlayment Required Wind Design Speed (Current ASCE):

- Risk Category 1: 110 mph
- Risk Category 2: 120 mph
- Risk Category 3: 130 mph
- Risk Category 4: 130 mph

Termites: Yes

DIGITAL PLAN REVIEW SUBMITTAL REQUIRMENTS

All submittals must be complete and correct or they will be rejected during the processing stage. PDF Submittals must contain the 4 PDF's listed below, named as per file naming instructions below, and emailed in a single email to:

PlanSubmittal@CityofSLT.US

Or hand delivered to the building department on a Single Flash Drive or CD. <u>Dropbox</u> and/or <u>Google Drive</u> links are encouraged if emailing large file sizes

Cannabis Business Specific Requirements	Applicants Initials Acknowledgement
A building permit is required to verify occupancy for a Cannabis Business, even if no improvements to the property are proposed.	
All plans and supporting documentation are required to be prepared by a licensed professional registered with the State of California and must address specific requirements for the use as outlined in the codes and standards adopted by the City of South Lake Tahoe and the State of California.	
Permits are not issued within the City for businesses that do not have the following: A valid Cannabis Use Permit, a Development Agreement, and a Valid Cannabis Public Safety License issued by the City.	
Applicants are to submit proof of compliance with California Water Boards Cannabis Policy and General Order in which apply to commercial Cannabis cultivation activities. The fact sheet at the hyperlink below addresses indoor commercial Cannabis cultivation regulatory requirements. https://www.waterboards.ca.gov/centralcoast/water_issues/programs/cannabis_cultivation/docs/faqsindoor_cultivation.pdf	
Applicants are to submit proof that they are in conformance with the electronic reporting requirements specific to the California Environmental Reporting System.	
Applicants will need to contact the Fire Department for direction and permitting related to hazardous materials inventory reporting.	

Construction Document Completeness Checklist - Sheet Numbers to be Completed by Applicant	
General Information Pages	Sheet #
Plot/Site Plan	
Architectural Plans including: Floor plan, elevations, roof plan, security elements, life safety alarm elements,	
door and window schedules, sections, etc.	
Structural Plans including: Foundation plan, framing plan with section drawings, floor framing plan, shear wall	
plan with schedules, roof framing plan, suspended ceiling framing, section drawings and all structural details as	
appropriate	
Electrical Plan	
Plumbing Plan	
Mechanical Plan	
Civil Drawings including ADA Path of Travel, Fire Laterals, Hydrant Placement/Locations, PIV, FDC, Apparatus	
Turning Capabilities, etc.	
TRPA BMP Plans and calculations http://tahoebmp.org/bmphandbook.aspx	
Fire Sprinkler/Fire Alarm layouts and specifications (if deferred, note item on cover sheet along with note that a	
separate permit is required for deferred submittals)	
Signage (if deferred please note item on cover sheet along with note that a separate permit is required for	
deferred submittals)	
Landscape Plan	
Cannabis related processing; Plant Oil Extraction requires items such as Class I, Division 1, Group D equipment	
within the booth, and Class I, Division 2, Group D equipment outside the booth and around openings with a 3	
feet clearance in all directions	
Cannabis Extraction Booths and Fume Hoods, Cut Sheets, Manufacturer Specifications, Listings, etc.	
Cannabis related processing / Food Equipment Cut Sheets	
Water supply, drainage calculations, CALGreen reductions and fixture drainage units	
Structural calculations: Two sets of calculations stamped and signed by the design professional	
Truss calculations and truss shop drawings may be submitted on a deferred basis when Design Professional lists	
the item on Cover Sheet; noting when submitted, they will be stamped by the architect or engineer of record in	
addition to the design engineer.	
Title 24 Energy Calculations: Incorporated into plan set pages, including but not limited to: ENV 1, ENV	
Mandatory Measures, MECH 1, LTG1, LTG Mandatory Measures, OLTG1, pages (if applicable)	

	zardous material declaration: List type & quantities of chemicals stored on site	
Exit	t Analysis: Seating and exiting layout	
	SPECIFIC PLAN SHEET INFORMATION	
1	GENERAL INFORMATION: (cover sheet)	Sheet #
	Project name & address, as well as project owner's name, address and phone number	
	Zoning with Planning Project Conditions (if applicable)	
	Name, title, address, phone number of design professional	
	Current applicable codes	
	Assessor Parcel Number (APN)	
	Occupancy group(s) and type of construction, fire sprinklers	
	Area separation walls and occupancy separation walls with applicable fire ratings, doors, opening	
	protections, etc.	
	Occupant load and exiting requirements (with calculations)	
	Note: The design for the occupant load is based on CBC Chapter 10, § 1004. Growing, storage and shipping	
	areas are 300 sq. ft. per person; cannabis infused products, testing and business areas are 100 sq. ft. per	
	person	
	Gross square footage for each separate occupancy classification	
	Total square footage of building and/or tenant improvement	
	Allowable area calculations	
	Detailed description of scope of work and pages numbered (x of y)	
	Index of drawings	
	Vicinity map identifying the subject property, the adjoining streets, and the major streets in the	
	surrounding area within a one-quarter mile radius of the site and North arrow	
	Stamp & wet signature of design professional (all sheets)	
	Special Inspection Program: Identify each item requiring special inspection considering items such as	
	excavation and filling, embedded anchors, structural masonry, welding, high strength bolts, smoke control	
	systems, etc.	
2	Plot/Site Plan	Sheet #
	Lot dimension showing whole parcel and property lines	
	Building footprint-providing dimensions to property lines	
	Identify location within building footprint where work is being done	
	Parking layout showing:	
	All parking spaces	
	 Location of specialty parking such as disabled access space parking, clean air vehicles, etc. 	
	 Location of specialty parking such as disabled access space parking, clean air vehicles, etc. Disabled access path of travel from public right of way and parking space to the building main 	
	 Location of specialty parking such as disabled access space parking, clean air vehicles, etc. Disabled access path of travel from public right of way and parking space to the building main entrance 	
	Disabled access path of travel from public right of way and parking space to the building main	
	Disabled access path of travel from public right of way and parking space to the building main entrance Identify uses of adjacent space or suites	
	 Disabled access path of travel from public right of way and parking space to the building main entrance 	
	Disabled access path of travel from public right of way and parking space to the building main entrance Identify uses of adjacent space or suites Identify building orientation and North arrow	
	Disabled access path of travel from public right of way and parking space to the building main entrance Identify uses of adjacent space or suites Identify building orientation and North arrow Show location of: Electrical room or meters	
	Disabled access path of travel from public right of way and parking space to the building main entrance Identify uses of adjacent space or suites Identify building orientation and North arrow Show location of: Electrical room or meters Sewer lines	
	Disabled access path of travel from public right of way and parking space to the building main entrance Identify uses of adjacent space or suites Identify building orientation and North arrow Show location of: Electrical room or meters Sewer lines Water lines w/meter or well location and back flow devices	
	 Disabled access path of travel from public right of way and parking space to the building main entrance Identify uses of adjacent space or suites Identify building orientation and North arrow Show location of: Electrical room or meters Sewer lines Water lines w/meter or well location and back flow devices Gas meters 	
	 Disabled access path of travel from public right of way and parking space to the building main entrance Identify uses of adjacent space or suites Identify building orientation and North arrow Show location of: Electrical room or meters Sewer lines Water lines w/meter or well location and back flow devices Gas meters Access roadways with driveway/egress location 	
	 Disabled access path of travel from public right of way and parking space to the building main entrance Identify uses of adjacent space or suites Identify building orientation and North arrow Show location of: Electrical room or meters Sewer lines Water lines w/meter or well location and back flow devices Gas meters Access roadways with driveway/egress location Curbs and gutters

	Show locations and provide installation details for all embedded hardware and reinforcing steel	
	Derail slab patch back expectations (rebar, thickness, vapor barrier etc.)	
4	Floor Plan	Sheet #
	Show size of all openings with type of window and swing of doors	
	Show new/existing path of travel to a public way with grade percentages	
	Show locations of mezzanines and stairways	
	Show locations of restrooms with disable access requirements	
	Show construction information for any tenant walls	
	Illustrate Cleary interior finishes complying with CBC Chapter 8	
	Provide seating plan within assembly uses and restaurants	
	Location type and sizes of all portable fire extinguishers	
	Clear work space at all electrical service panels	
	Occupancy separation details with GA file numbers or equivalent	
	Identify any rated corridor systems, areas separation walls, fire walls, etc. Note: Provide fire rated	
	assemblies with GA file numbers or equivalent, specify intumescent caulk, pads, etc.	
	Storage layout (aisle widths) and shelving plans (for shelving over 6' engineering required)	
	storage tayout (uiste withins) and sherving plans (for sherving over or engineering required)	
5	Fire Plan	Sheet #
	All applicants will need to incorporate into plans a detailed scope of work related to all business activities	
	and products utilized in their business model or process.	
	Fire Prevention Required Noted on Plans:	
	Prior to finalization of building permit, annual operation permits will need to be secured with the Fire	
	Department Operation Permits must be listed on title sheet of plans.	
	Signage detailed with regard to smoking or carrying of a lighted pipe, cigar, cigarette or any other type of	
	smoking paraphernalia or material is prohibited in the areas indicated in CFC § 310.	
	Note on plans that storage of combustible materials in buildings shall be orderly. Storage shall be	
	separated from heaters or heating devices by distance or shielding so that ignition cannot occur per CFC §	
	315.	
	Note on plans that any security device or system that emits any medium that could obscure a means of	
	egress in any building, structure or premise shall be prohibited per CFC § 316.	
	Note on plans that reporting of emergencies, coordination with emergency response forces, emergency	
	plans and procedures for managing or responding to emergencies shall comply with the provisions of CFC §	
	401.	
	Note on plans that Emergency evacuation drills complying with provisions of this section shall be	
	conducted at least annually for Group F occupancies listed in section 404 or when required by the fire code	
	official. Drills shall be designed in cooperation with the California Fire Code and local authorities per CFC §	
	405.	
	Compliance with CFC § 407 shall be applicable where hazardous materials subject to permits under CFC	
	§5001.5 are used and/or stored on the premises or where required by the fire code official.	
	Location of Knox box; access to or within a structure or an area is restricted because of secured openings	
	or where immediate access is necessary for life-saving or fire-fighting purposes, the Fire Code Official is	
	authorized to require a key box to be installed in an approved location. The key box shall be of an	
	approved type and shall contain keys to gain necessary access as required by the fire code official per CFC	
	§506.1	
	Detail locations of portable fire extinguishers shall be installed in F, B and U occupancy groups per CFC §	
	906. The size and distribution of portable fire extinguishers shall be in accordance with CFC § 906 and	
	California Code of Regulations, Title 19.	
	Detail locations of duct smoke detectors complying with UL 268A shall be installed in accordance with the	
	CBC, CFC, CMC and NFPA 72 in the main supply air duct of each air-conditioning system having a capacity	
	greater than 2,000 CFM.	
	Note on plans an approved fire alarm system installed in accordance with the provisions of the CFC and	
	NFPA 72 shall be provided in new buildings and structures in accordance with CFC § 907.2 and provide	

	occupant notification in accordance with CFC § 907.6, unless other requirements are provided by another	
	section of this code.	
	High-piled storage or rack storage in any occupancy group shall comply with CFC Chapter 32.	
	Storage, use and handling of compressed gases in compressed containers, cylinders, tanks, and systems shall comply with CFC Chapter 53 including those gases regulated elsewhere in the CFC. Partially full	
	compressed gas container, cylinders or tanks containing residual gases shall be considered as full for	
	purposes of the controls required.	
	· ·	
	Compressed gases classified as hazardous materials shall also comply with CFC Chapter 50 for general requirements and the applicable sections of Chapters 58 (Flammable Gases), 60 (Highly Toxic and Toxic	
	Materials), 63 (Oxidizer, Oxidizing Gases and Oxidizing Cryogenic Fluids) and 64 (Pyrophoric Materials). The storage, use and handling of all hazardous materials shall be in accordance with CFC Chapter 50	
	(Hazardous Materials) and the applicable sections of Chapter 54 (Corrosive Materials), Chapter 55	
	(Cryogenic Fluids), Chapter 57 (Flammable and Combustible Liquids) and Chapter 58 (Flammable Gases and	
	Flammable Cryogenic Fluids). The maximum allowable quantity of hazardous materials per control area will	
	be established using CFC § 5003.1. Applicant will need to contact the Fire Inspector for hazardous materials	
	storage, use and handling requirements.	
	Hazardous Materials Inventory Statement (HMIS) per CFC § 5001.5.2. An application for building permit	
	shall include an HMIS. The HMIS shall include the following information:	
	A. Product name.	
	B. Component.	
	C. Chemical Abstract Service (CAS) number.	
	D. Location where stored or used.	
	E. Container size.	
	F. Hazard classification.	
	G. Amount in storage.	
	H. Amount in use-closed systems.	
	I. Amount in use-open systems.

The number of required fixtures shall be calculated using CPC § 422.1, Table 422.1 and Table A. Plumbing fixtures and fixture fittings must be designed for individuals with disabilities and with the appropriate standards. Provide plumbing isometric/schematic showing hot and cold water, sewer, soil, grease traps, waste vents and cleanout sizes and materials Show complete drainage system with pipe sizes and piping material Show water piping system (hot and cold), pipe sizes and piping material Show location of all gas meters and all gas piping location and sizing on plumbing floor plan Show location of water heaters, boilers and any other equipment on plumbing floor plan Provide water sizing calculations and show drainage fixture count and pipe sizing calculations Complete roof drainage and parking drainage system with calculations Grease interceptor installation & cleaning instructions Mechanical Plan The design of the system shall be such that the emissions or other odors are confined to the area in which they are generated by air currents, hoods, or enclosures and shall be exhausted by a duct system to a safe location or treated by removing contaminants. Provide an exhaust system (e.g. carbon scrubbers) designed and constructed to capture sources of contaminants to prevent spreading of contaminants to other parts of the occupied spaces of the building (CMC Chapter 5). Building elements separating the cannabis agricultural area from other occupied portions of the building must be air sealed to prevent odor migration into adjacent spaces.	
	New plumbing installations and alterations must meet requirements of the California Plumbing Code (CPC). The number of required fixtures shall be calculated using CPC § 422.1, Table 422.1 and Table A. Plumbing fixtures and fixture fittings must be designed for individuals with disabilities and with the appropriate standards. Provide plumbing isometric/schematic showing hot and cold water, sewer, soil, grease traps, waste vents and cleanout sizes and materials Show complete drainage system with pipe sizes and piping material Show water piping system (hot and cold), pipe sizes and piping material Show location of all gas meters and all gas piping location and sizing on plumbing floor plan Show location of water heaters, boilers and any other equipment on plumbing floor plan Provide water sizing calculations and show drainage fixture count and pipe sizing calculations Complete roof drainage and parking drainage system with calculations Grease interceptor installation & cleaning instructions Mechanical Plan The design of the system shall be such that the emissions or other odors are confined to the area in which they are generated by air currents, hoods, or enclosures and shall be exhausted by a duct system to a safe location or treated by removing contaminants. Provide an exhaust system (e.g. carbon scrubbers) designed and constructed to capture sources of contaminants to prevent spreading of contaminants to other parts of the occupied spaces of the building (CMC Chapter 5). Building elements separating the cannabis agricultural area from other occupied portions of the building must be air sealed to prevent odor migration into adjacent spaces. The inlet for the ventilation system must be located in the area(s) of the highest contaminant	
	New plumbing installations and alterations must meet requirements of the California Plumbing Code (CPC). _		
	Ventilation required. Every occupied space shall be ventilated by natural means in accordance with CMC	
	§402.2 or by mechanical means in accordance with CMC § 402.3.	
	Include cut sheets into plans with regard to label information. A permanent factory-applied nameplate	
	shall be affixed to appliances on which shall appear in legible lettering, the manufacturer's name or	
	trademark, the model number, serial number and the seal or mark of the approved agency. A label shall	
	also include all applicable information per CMC § 307	
	Size and location of all duct work, plenums, registers, fire dampers, fresh air intakes, and air flow in CFMs	
	Size and location of all combustion air openings (when gas appliances are used)	
	Size, type and termination of any gas vents, grease ducts, etc.	
	Details of any rated shafts and corresponding GA-File number and/or Fire Barrier Duct Wrap UL	
	information; including installation details in accordance with State Fire Marshall regulations	
	Show equipment size, weight, manufacturer's name and model number (engineering for any new loads or	
	penetrations on existing framing).	
	Provide equipment attachment details per manufacturer's specifications	
	Indicate which rooms are to be conditioned and how	
	Provide minimum ventilation and outside air	
	Provide manufacturer's specs and valuation of walk in cooler boxes	
	Exhaust Hood, provide the following:	
	Dimensions, details, and construction listing (U.L. or equal) for the duct enclosure (shaft)	
	Grease duct location, materials, dimensions and calculations for the duct air velocity	
	Show locations, type and size of ducts and equipment	
	Provide CFM of exhaust and make up air	
	Indicate type of fire suppression equipment	
	Show location of exhaust termination	
	Detail any specialized instruction and listings	
	Roof plan showing the location of all exhaust, supply air and HVAC equipment

features that determine compliance with Building Energy Efficiency Standards and other applicable building codes. Alterations must comply with mandatory measures for the altered components. CalGreen Code Requirements California Green Building Standards Code provides provisions to outline planning design and development methods for environmentally responsible site and building design to protect, restore and enhance the environmental quality of the site, building and respect the integrity of adjacent properties. Alterations and additions to existing buildings must include a Green Building Check List for non-residential construction if the valuation is \$200,000 or greater or if the addition is 1,000 square feet or larger. **Security Plan** 226011.5, 26070 6012, 26013 and 26130, Business and Professions Code Show limited-access areas, areas used for video surveillance monitoring and surveillance system storage devices, and all security camera locations. Identify means to prevent access without reducing egress to the manufacturing premises by unauthorized persons and protect the physical safety of employees. This includes, but is not limited to: (1) Establishing physical barriers to secure perimeter access and all points of entry into a manufacturing premises (such as locking primary entrances with commercial grade, non-residential door locks, or providing fencing around the grounds and driveway, and securing any secondary entrances including windows, roofs, or ventilation systems); (2) Installing a security alarm system to notify and record incident(s) where physical barriers have been breached Detail means of Video Surveillance and provide cut sheets for equipment (a) At minimum, licensed premises shall have a digital video surveillance system with a minimum camera resolution of 1280 × 720 pixels. The video surveillance system shall be able to effectively and clearly record images of the area under surveillance. (b) To the extent reasonably possible, all video surveillance cameras shall be installed in a manner that prevents intentional obstruction, tampering with, or disabling. (c) Areas that shall be recorded on the video surveillance system include the following: (1) Areas where cannabis or cannabis products are weighed, packed, stored, quarantined, loaded and unloaded for transportation, prepared, or moved within the premises; (2) Limited-access areas; (3) Security rooms; (4) Areas containing surveillance-system storage devices, which shall contain at least one camera to record the access points to such an area; and (5) The interior and exterior of all entrances and exits to the premises. (d) The surveillance system shall record continuously 24 hours per day and at a minimum speed of 15 frames per second. (e) Any on-site surveillance system storage devices shall be located in secure rooms or areas of the premises in an accesscontrolled environment. (f) The licensee shall ensure that all surveillance recordings are kept for a minimum of 90 days. (g) All video surveillance recordings shall be available on the licensed premises and are subject to inspection by the Department and shall also be copied and sent, or otherwise provided, to the Department upon request. (h) The video recordings shall display the current date and time of recorded events. Time is to be measured in accordance with the U.S. National Institute of Standards and Technology standards. The displayed date and time shall not significantly obstruct the view of recorded images. (i) If multiple licensed premises are contained within the same building, a single video surveillance system covering the entire building may be used by all of the licensees under the following conditions: (1) Each applicant or licensee shall disclose on their premises diagram where the surveillance recordings are stored; (2) Each applicant or licensee shall include in their security operating procedures an explanation of how the video surveillance system will be shared, including who is responsible for monitoring the video footage and storing any video recordings; (3) All licensees shall have immediate access to the surveillance recordings to produce them pursuant to the requirements of this section; (4) All licensees shall be held responsible and subject to discipline for any violations of the video surveillance requirements. **Landscape and Irrigation Plans** 11 Show all existing and proposed landscaping

	Show all existing trees and trees proposed to be removed with diameter at breast height	
	Plant key showing quantities, container sizes, botanical designations	
	Proposed ground cover or mulch application	
	Show proposed irrigation system with components and specifications	
	Model Water Efficient Landscape Ordinance calculations and explanation of compliance prepared and	
	stamped by a CA licensed Landscape Architect (if necessary)	
12	Cultivation Facilities	
	Mixed use grow facilities are to are most likely meet CBC, Chapter 3 requirements based upon Use and	
	Occupancy Classification for a Factory Industrial, F-1, Moderate-hazard Occupancy. CBC § 306.2. or as	
	determined by the registered design professional preparing the plans.	
	Grow facilities such as greenhouses for the exclusive use of plant production may be classified as a U	
	occupancy and shall be consistent with the requirements of CBC Appendix C.	
	Grow lights must be installed per the manufacturer's instructions and wired per CEC article 410.	
	NM cable (Romex) is not allowed for use in damp locations (grow rooms) (CEC § 334.10). Approved wiring	
	methods utilized in grow facilities shall be in accordance with wet use "Wiring Methods and Materials",	
	(CEC Chapter 3).	
	5. Cultivation facility exhaust outlets must be located 10' from the property lines, operable openings into	
	the building and from mechanical air intakes (CMC § 506.9)	
13	Manufacturing Facility	
	Volatile manufacturing is not permitted in the City of South Lake Tahoe .	
	Portions of the cannabis Infused Product facilities may be considered a Hazardous Location based on the	
	method used for the THC extraction and the amount of hazardous material stored. Full disclosure of the	
	extraction process will be required at the time of building permit submittal.	
	Cannabis manufacturing facilities shall submit as a part of their permit application a comprehensive	
	description of the program and process proposed for the operation and production at the facility. The	
	documentation shall, as applies, include all of the following:	
	A. A plan that specifies all means to be used for extracting, heating, washing, or otherwise changing the	
	form of the cannabis plant or for testing any cannabis or cannabis product and safety measures for each	
	such process.	
	B. A description of all toxic, flammable, or other materials regulated by a federal, state, or local	
	government that will be used, kept, or created at the facility, the quantities and location of such materials,	
	and the manner in which such materials will be stored.	
	C. A description of the processes used to extract or distill cannabis derivatives from their source and the	
	processes used to incorporate cannabis derivatives into all retail cannabis products produced.	
	Concentrations of grease, smoke, heat, steam or products of combustion created when cannabis is	
	manufactured into products including, but not limited to, foods, beverages, salves, inhalants and tinctures	
	are to be contained as detailed in the CMC §s 506 and 507 (Type I and Type II hoods).	
	Facilities used for processing cannabis into foods, beverages, salves, inhalants, tinctures or other forms for	
	human consumption or use are subject to review and approval by the California Department of Public	
	Health, Manufactured Cannabis Safety Branch. A separate license application is required through their	
	office.	
	Sanitation requirements for facilities used for processing cannabis into foods, beverages, salves, inhalants	
	and tinctures shall meet the California Department of Public Health guidelines that are to be detailed on	
	the drawings.	
	Infused product extraction and hazard containment equipment must be listed, labeled and installed per	
L	CEC 110.3.	
	Storage, use and handling of compressed gases in compressed gas containers, cylinders, tanks and systems	
	shall comply with CFC, NFPA Standards, H&SC and CCR, including those gases regulated elsewhere in this	
	code. Partially full compressed gas containers, cylinders or tanks containing residual gases shall be	
	considered as full for the purposes of the controls required. Compressed gases classified as hazardous	
	materials shall also comply with CFC Chapters 50 and 53 for general requirements and chapters addressing	
	specific hazards, including Chapters 58 (Flammable Gases), 60 (Highly Toxic and Toxic Materials), 63	
	(Oxidizers, Oxidizing Gases and Oxidizing Cryogenic Fluids) and 41 (Pyrophoric Materials).	

14	Testing/Laboratory	
	Testing/Laboratory facilities are most likely to meet CBC requirements based upon Use and Occupancy	
	Classification for a Business Group, B, and Occupancy CBC § 304 or Laboratories Group, L Occupancy CBC §	
	313 as determined by the registered design professional preparing the plans.	
	Required hoods shall meet the requirements of CMC §s 506, 507 and 508.	
	Hazardous materials storage, use, handling and wastes shall be permitted and reported through the Fire	
	Department prior to operation.	
15	Dispensaries	
	Dispensary facilities are most likely to meet CBC to meet CBC, Chapter 3 requirements based upon Use and	
	Occupancy Classification for a Mercantile Group, M, Occupancy. CBC § 309.1. or as determined by the	
	registered design professional preparing the plans	

Design requirements shall apply as follows:

- Minimum soil bearing pressure of 1,500 pounds per square foot (the project Engineer may claim up to 2,000 psi without a soils report)
- The Basic Wind Speed is 110 mph, 3 second gust, Exposure B (within 300 feet of the Lake Shore = Exposure C)
- Seismic Site Design Category D
- Climate Zone 16
- Ground Snow Load 150 lbs.
- Wildland Urban Interface (WUI) Codes and Standards

I verify that I am submitting all the required materials on this checklist and I acknowledge that failure to comply with these requirements may result in my application not being accepted and/or may extend the length of time needed to review the project.
