Solar Interconnection Application Approved LIB-000xx

1/1/2021

Hello **Liberty Customer**,

We have reviewed and approved your non-incentive solar application. With this notice you have Liberty's authorization to begin construction of the project.

- Program: **Liberty Net Metering Program**
- Host Customer: **Liberty Customer**
- Category: **Residential**
- Installation Address: **100 Main St., Sometown, CA 96161**
- Date: **1/1/2021**
- Approved Maximum System Production: **x,xxx kWh per year**
- Incentive: **\$0.00***

**This approved application was not submitted to the Solar Incentive Program. Reach the Liberty solar team for more information about incentive program eligibility. Note that solar projects are not eligible for incentive if Applicants do not apply for and receive an approved Incentive Reservation Notice prior to starting system construction.*

Important Next Steps

CONSTRUCTION

To request interconnection of your system after construction is complete, the person responsible for handling the application (*this application was originally submitted by **Liberty Customer Anderson***), will complete the "Interconnection Request" form in PowerClerk. The signed off building permit must be available to upload to this form. The Applicant can open PowerClerk directly with this [link](#).

Once the required information is provided through PowerClerk, Liberty will review the request. If complete, Liberty Utilities will install the required metering and your system can be energized.

We will send you communications along the way so you know the status of your application.

Questions?

We'd like to help. Please don't reply to this email.
